Printing Tipp: In order to save paper when printing long documents such as this one, a user can either just print the pages of interest,

or:

Choose 'Print all' in the Page Print Screen, make certain 'Reverse Pages' is not selected, select 'Odd Pages Only' and then 'Print'.

Once this has printed the odd pages, i.e. 1,3,5 etc. remove the pages from the printer, invert them, insert them back into the in-tray

of the printer. Select 'Print All', 'Reverse Pages', and 'Even Pages Only'.

This will result in a double sided print in the correct order, save half the paper and some of the forests too!

The other alternative is to source or loan a duplex printer. This will simply do it all automatically.
